Will the OA Team pay my APC?
Yes, if the following conditions apply:

- Your paper acknowledges research funding from a block grant provider
- The corresponding author is affiliated with the University of Cambridge
- Your funder will pay APCs for your paper type
- Your funder supports APCs in your journal
- Your paper is not eligible under a publishing deal
- The block grant has sufficient funds to pay
- You have deposited your paper via Symplectic Elements
- The Open Access Team has agreed to pay

The University receives block grants from British Heart Foundation (BHF), Cancer Research UK (CRUK), UKRI/RCUK (AHRC, BBSRC, ESRC, EPSRC, MRC, NERC, STFC). Research England and Innovate UK may be eligible; more information is available in Annex 1 of the UKRI policy; and Wellcome Trust.

The funders cover APCs for papers that report original research. There is more information on the Open Access website.

BHF and CRUK will pay APCs in hybrid and fully gold journals. UKRI/RCUK and Wellcome Trust will pay APCs in transformative or fully gold journals.

Please use a publishing deal where available; if eligible, the APC is already covered. Conditions apply. See our website for details.

Block grants are finite and can run out. Upload your accepted manuscript before you agree to pay anything. You will then receive funding advice from the Open Access Team. Block grant funding cannot be reserved.

Upload your paper via Symplectic Elements: the Open Access Team will deposit your paper in Apollo to ensure REF compliance and will confirm if we can pay the APC.
